

Interpon D Oasis

Interpon D Approved Applicator and Service First Associate Euro Quality Coatings have recently completed powder coating on the Oasis Academy in Enfield.

Interpon D1036 in green, yellow, pink and blue was specified on the window pods of the academy, creating an eye-catching and modern look.

AkzoNobel Powder Coatings range of architectural powders, Interpon D1036, provide superior exterior durability and colour retention and conforms to the requirements of all the major European architectural finishing standards.

The 1150 pupil academy building was completed this year with some specific design requirements. These included all teaching spaces to have a 2% daylight factor as well as the brightly coloured façade windows to create natural ventilation.

The education academy is part of the Oasis UK charity, which provides educational, healthcare and housing projects around the world.
