

## Wybone Ltd Interpon Powder Coatings

Wybone Ltd are one of the UK's leading suppliers of street furniture and waste management solutions. Established for over thirty five years, Wybone Ltd manufacture standard and bespoke products using a wide range of Interpon Powder Coatings supplied by Cromadex Leeds.

Wybone's range of street bins are coated in Interpon EC – a polyurethane powder coating that offers a range of benefits to suit outdoor use and architectural applications. They have been formulated to have outstanding anti-graffiti properties, excellent durability, proven performance and improved aesthetics lending them to a number of highly visible external applications such as Wybone's street bins (see pictures above).

Another of Wybone's designs, 80RB, has been used by the NHS after being coated in Interpon AB (see picture below).

Above: 80RB Bin

Interpon AB is a range of antibacterial powder coatings designed to help fight against bacterial contamination. It can provide an effective secondary support to existing cleaning regimes in healthcare, food hygiene and domestic environments.

Wybone are very happy with the service they receive from Cromadex and the quality of Interpon Powder Coatings. Wayne Frostick, Sackholding and Powder Coatings Manager says:

*“Before we started using Cromadex, we didn't realise that these levels of service and technical assistance were available to us. Your whole outfit, from the range of literature to the rapid technical back up comes across as extremely professional.”*
