INTERPON 610 ANTIQUE SILVER MW401T

AKZO NOBEL

Interpon 610 Antique Silver MW401T

Product Attributes:

Interpon 610 Antique Silver – MW401T is based on Akzo Nobel patented particle management technology which provided advanced fluidization resulting in a consistent and smoother application of metallic finishes. The resultant cured film exhibits a uniform textured pattern to resemble the appearance of an antique embossed metal.

Applications:

Interpon 610 Antique Silver MW401T is designed for application over metals such as steel, galvanized steel and aluminium for exterior and internal applications. The uniform texture pattern has been designed to mask surface irregularities such as weld splatter, welds, pitting and other surface defects to provide a uniform and distinctive antique appearance.

Interpon 610 Antique Silver MW401T is ideal for transportation applications such as bull bars, trailers, accessories and agricultural machinery. Other applications include interior/exterior furniture, light fittings and garden/street furniture, shelving, racking gym equipment and other applications.

Benefits:

Interpon 610 Antique Silver MW401T offers **improved texture and colour consistency** compared to standard finishes as a result of Akzo Nobel's patented particle management technology.

Interpon 610 Antique Silver MW401T offers **enhanced weathering and chemical resistance** compared to similar competitor finishes in a single coat finish.

Disclaimer

Unless otherwise agreed by us in writing, any contract to purchase products referred to in this colour card and any advice which we give in connection with the supply of products are subject to our standard conditions of sale. Typical end uses for **Interpon** products are displayed in this publication using actual projects and representative images.

Interpon® is a registered trademark of Akzo Nobel International BV.

Additional advice

Akzo Nobel recommends the application of **Interpon Supaclear VP188** for aggressive environments or where longer term appearance of the metallic lustre is required.

Akzo Nobel recommends the application of **PZ550** or **PZ770** zinc primer over steel to enhance corrosion resistance of powders such as **MW401T**.

For application please refer to the **Interpon 610 MW401T** technical data sheet.
