

Celebrating with Niftylift 750R & 800

Niftylift Ltd have celebrated completing their 1000th chassis at their manufacturing site in Barnsley. The company are globally recognised for their design, development, manufacture and service of high quality aerial work platforms, ranging from 9m to 21m, in self propelled, trailer and self drive configurations.

Niftylift have used coatings from Cromadex for more than 10 years, and have been manufacturing at their site in Barnsley since 2007.

The Niftylift team at Barnsley

After being shotblasted, their machines are coated with 750 Rapid Primer and 800 Topcoat, part of the Cromadex Extra Life system. They use a wide range of colours, including their own corporate shade - Niftylift green.

Cromadex Area Sales Manager Chris Jackson was on site to congratulate the Niftylift team and present Production Manager Martin Hudson with Champagne and Extra Life certificates.

Martin Hudson explains, "Cromadex are able to offer an extensive range of colours, all lead-free, isocyanate-free and available for next day delivery. This is a great fit with the requirements of our customers. With the aid of Extra Life we are able to offer our customers an excellent paint finish with the added benefit of an extended coating lifespan of up to 15 years"
